

Congratulations!

Your QUALCOMM Globalstar Fixed Satellite Phone is easy to use, versatile, and dependable.

Making a call

1. Pick up the telephone handset.
2. Listen for the dial tone. When you hear the dial tone, dial the telephone number.
3. After a silent pause, the number will be sent over the system.
4. To avoid the pause, press #.

Ending a call

To end a call, replace the handset in the cradle. Be sure the handset is seated properly.

Receiving a call

When you have an incoming call, the telephones connected to the QUALCOMM Globalstar Fixed Satellite Phone will ring. To answer the call, pick up any handset and speak into it.

Note

If the person at the other end of the call hangs up, the call is ended.

Types of calling tones

When you listen to the handset, you may hear any of the following calling tones:

Type of Tone	Explanation
Ring	A ringing sound from your telephone announces an incoming call.
Dial	A steady tone indicates the phone is ready to use.
Busy/Reorder	A tone advising that the call did not go through. This is because: <ul style="list-style-type: none">■ The number dialed is busy■ No lines are available■ You are not connected to Globalstar Service. Try the number again later.
Intercept	An alternating tone indicating that something is wrong with the call. Hang up and try the call again.
