- Dimensions: Approx. 6" H x 3.2" W x 2.1" D
- Weight: 1.2 lb.

If you can see the sky, you can stay in touch.

The Globalstar FAU-200 Fixed Phone is the ideal cost-effective solution to access the coverage and reliability of satellite telephone service. It enables remotely located businesses and individuals to connect into the public telephone network through the Globalstar system, using standard telephone equipment and wiring.

Convenient Features

Crystal-Clear Voice Service

Globalstar Satellite phone service offers CDMA-digital call quality that rivals the best of cellular, with no voice delay and no coverage gaps within the Globalstar service area. Only Globalstar uses Path Diversity™, accessing up to four satellites at the same time to make or receive calls. The multiple satellites combine their signals to ensure maximum service quality.

Standard North American Dialing

Globalstar is the only satellite phone service that offers standard North American dialing patterns. That means Globalstar is the *only* satellite phone service that lets you:

- Make and receive calls just like on your home phone. No hard-to-remember codes or PINs.
- Complete calls to national "800" numbers.
- Give your callers your Globalstar number with confidence. Their phone provider will charge callers as they would to dial any standard US-based number.

Custom Installation Configurations

Installation of the FAU-200 is quick and simple. The weather-proof unit is mounted at a convenient outdoor location with a clear view of the sky. The Globalstar FAU-200 can be installed anywhere you need the coverage and reliability of Globalstar:

- Commercial and industrial sites
- Office buildings
- Rural and remote homes
- Large vehicles such as RV's
- Emergency response command vehicles

Simple Antenna Set-up

- The fixed, omni-directional antenna means greater reliability. No aiming or calibration required. No moving parts to break or wear out.

Standard Telephone Equipment

Use your Globalstar FAU-200 with any off-the-shelf FCC-approved phone (sold separately), including:

- Standard Handsets
- Desktop speakerphones
- Answering machines
- Cordless phones
- Analog PABX systems-

Optional Uninterrupted Power Supply

- See dealer for options.
